How to Change a Blade on a Landis 5in1

Using a hammer and punch

1. Remove lower support roll by tapping it in a **counter-clockwise** direction.
2. Remove upper cutting blade by tapping it in a **clockwise** direction.

Note: this is the same direction blade turns when Cutting.

3. Install new blade by screwing it on and locking it tight with your hammer and punch.
4. Install lower support roll same way as step #3
